

4260 El Camino Real - Siding

We looked at nearby buildings when choosing siding for 4260 El Camino Real. Many nearby buildings use white, grey, or a shade of tan. A significant number of buildings have used metal panels. The large nearby Elks building uses silver corrugated metal panels for much of its siding. Both the McLaren building and the Volvo building use flat silver metal panels. The Tesla building uses grey blocks, a smooth flat grey surface, and a smooth red surface. The Homewood Suites building uses red bricks, and metallic silver panels as a large accent on mostly nearly white flat cement surfaces. The Hotel Cabana adjacent to 4260 El Camino Real has a red metal roof, grey walls, white walls, and yellow-tan walls.
